DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-2, drawn to a communication system, classified in class 709, subclass
 202.
 - II. Claims 3-6, drawn to a server/terminal, classified in class 709, subclass 223.
 - III. Claims 7-8, drawn to a billing system, classified in class 705, subclass 34.
 - IV. Claim 9, drawn to a communication method, classified in class 370, subclass 409.
 - V. Claim 10, drawn to a billing method, classified in class 705, subclass 40.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions V and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to practice a point-of-sale process.
- 3. Inventions I and IV, V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced with a materially different product, e.g. an automated e-mail messaging system.

Application/Control Number: 09/775,097

Art Unit: 3627

4. Inventions I and II, III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a server used with an emergency voice communication system. See MPEP § 806.05(d).

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV and V, restriction for examination purposes as indicated is proper.
- 7. A telephone call was made to Thomas Scherer (Reg. No. 45,079) on or about September 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3627
